06:49:56   Carol Brieseman: The global gaming industry is bigger than the film and music industries combined, but New Zealand has barely started playing. Sean Kaiwai is at the top of his game. But he isn't revered alongside other sports stars such as Valerie Adams (check her out in the Shot Put – Olympics!). Kaiwai – who goes by the moniker Gratisfaction online – is New Zealand's top-earning esports star. For many, gaming is a hobby, a way to pass time during a global pandemic, or an escape from reality. For him, it's his livelihood and career. Over his playing career, Kaiwai has made around US$120,465.93 from tournaments alone. But the

esports scene in New Zealand pales in comparison to overseas markets. In fact, the entire gaming industry is rather abysmal. But that just leaves room for incredible growth!

06:51:15   Tanka Bahadur Karki: Thanks a lot!!🙏

06:52:16   Jessica Janusz: Its called shadow hack ?

07:01:51   Eric Anderson: Tried hard to open Fortnite Creative to my 4th graders but my district pushed back because you technically are supposed to be 13 to have a Fortnite account (even though I bet 75% of my kiddos play!). Couldn't do Minecraft because it required a MS account and we are a Google district. Trying but hitting roadblocks!

07:02:00   Jason Hoeft: Personally I think Fortnite is okay (played since Alpha 2), but as kids go from HS into college there isn't a lot of collegiate fortnite being played.
